Rental Business Homepage

Project documentation and README

A responsive React homepage for Rental Business, covering corporate car rental, employee transport, hotel accommodation and other business services.

Stack: React 19, Vite, plain CSS

1. Project overview

Rental Business Homepage is a single-page marketing site built. It is organised into small reusable components, with all text and content kept in one data file so the page can be updated without touching component code.

Key features

- Floating pill navbar with Services and About dropdowns and a mobile hamburger menu
- Hero with a four-slide thumbnail selector
- Auto-scrolling client logo strip and hotel partner strip
- Our Services and Why Rental Business card grids
- Driven by Trust banner with highlights
- Success Stories carousel with previous and next controls
- FAQ accordion where one answer is open at a time
- Footer with quick links, offices, contact details, stats bar and social links
- Responsive layout for desktop, tablet and mobile, with keyboard focus styles and reduced-motion support

Technology stack

Area	Choice
UI library	React 19.3.1
Build tool	Vite 8.3.5
Styling	Plain CSS
Font	Intern

2. Prerequisites

- Node.js 24.14.1
- npm, which is included with Node.js
- Git, for cloning and pushing the repository
- An internet connection, for installing packages and loading the Intern font

3. Setup

1. Clone the repository.

```
git clone https://github.com/Satyam428-dot/homePage.git
```

2. Install dependencies.

```
npm install
```

4. Run the project

Command	What it does
npm run dev	Starts the development server at http://localhost:5173 with live reload
npm run build	Creates an optimised production build in the dist folder

6. Responsive behaviour

Device	Width	Behaviour
Desktop	Above 960 px	Full layout with pill navbar, 4-column services and 3-column
Tablet	561 to 960 px	Hamburger menu, 2-column card grids, stacked footer
Mobile	560 px and below	Single-column cards

7. Project structure

```
src/
  components/
    common/      Button, Logo, SectionHeading, Marquee, ImageCard, Accordion
    layout/      Navbar, Footer
    sections/    Hero, Clients, Services, WhyUs, Trust, Stories, Partners, Faq
  data/
    content.js   All page text and content
  pages/
    Home.jsx     Page composition
  App.jsx
  main.jsx
  index.css      Global styles and responsive rules
```

Component reference

Component	Purpose
Button	button with the yellow icon dot, used for calls to action
Logo	TripKartz wordmark and tagline, in normal and large sizes
SectionHeading	Two-tone heading, for example Our Services
Marquee	Infinite horizontal scroller used for client and partner strips
ImageCard	Card with an image or gradient background and a text overlay
Accordion	Accessible expand and collapse list used by the FAQ
Navbar / Footer	Site-wide layout components

8. Dependencies

Runtime

Package	Version	Purpose
react	^19.3.1	UI library
react-dom	^19.3.1	Renders React into the page

Development only

Package	Version	Purpose
vite	^8.3.5	Dev server and production build

10. Git workflow

Branch	Purpose
main	Stable, release-ready code
develop	Integration branch
feature/setup-and-layout	Project setup, Navbar, Footer, common components
feature/homepage-sections	All homepage sections

Quick command reference

```
git init
git clone
git switch <branch_name>
git checkout -b <branch_name>
git push -u origin <branch_name>
git merge <branch_name>
git pull origin main
```
